Matriculation
Pramod Chandra Patra High School, Lembhei
03/2012 - 04/2013

SKILLS

HTML CSS Bootstrap SASS Java Script

jQuery React JS Redux My SQL JSON

GIT

PROJECTS

Ecommerce website
- I have developed two such websites (ex: curefit and flipkart) by using ReactJS which includes : rendering of data from the own custom API , adding the items into the cart, removing items from the cart, payment methods etc.

Friends List
- In this development we can ADD multiple friends to the friends list , we can SEARCH particular friend using search bar, we can DELETE particular friend also we can FAVOURITE friend and it has a proper pagination i.e each page contains four friends. I have used React Js for this development.

Portfolio
- This portfolio has five components such as home, about, skills, projects, contact. User can also download the resume from the about component and also send me an email from the contact component. This website is fully responsive and the technology which i have used for this portfolio is ReactJS .
